SUMMARY

Results-driven Software Engineer with full-stack and cloud data platform experience. Skilled in building scalable applications with React, Node.js, and .NET, and in architecting Snowflake data platforms from proof of concept to production. Strong background in database optimization, AWS/Azure cloud services, and cross-team technical leadership, with a track record of improving system performance, reducing costs, and mentoring others. Passionate about leveraging modern technologies to solve complex business problems.

SKILLS

<u>Programming Languages:</u>	TypeScript, JavaScript, Go, Java, Python, C#
<u>Front-end:</u>	React, Next.js, React Native, Blazor, Vue.js
<u>Back-end:</u>	Node.js, Express, .NET
<u>Database:</u>	Microsoft SQL Server, MongoDB, PostgreSQL
<u>Infrastructure:</u>	AWS, Microsoft Azure
<u>Languages:</u>	English (native), Russian (fluent), Uzbek (fluent)

WORK EXPERIENCE

Software Engineer

Quest Analytics

December 2024 – Current

Wichita, KS

- Architected and shipped a production Snowflake data platform from initial proof of concept, establishing the foundational architecture now scaling across the organization
- Optimized Snowflake task performance for scenario modeling workloads, reducing run times from ~1 hour to seconds (>99% improvement)
- Selected to lead a top-priority cost-reduction initiative migrating Snowflake workloads off task graphs, reducing the cost of Snowflake by half
- Delivered V2 of a geospatial network coverage mapping tool as a key contributor, introducing React tools to replace legacy raw HTML/JS - accelerating delivery and improving long-term maintainability
- Built core functionality for a provider management platform, including provider action workflows and Snowflake-driven notification management
- Mentored a software engineering intern through to full-time conversion

Software Engineer

INTRUST Bank

March 2024 – December 2024

Wichita, KS

- Developing custom internal web applications to automate and streamline business processes
- Updated inefficient SQL queries to improve developer dashboard loading speeds by up to 90%
- Led adoption of SQL Server Database Projects, improving efficiency and version control

Software Engineer

Koch Minerals & Trading (Koch Industries)

February 2023 – January 2024

Wichita, KS

- Enhanced financial transaction management by maintaining a critical internal web application utilized by the finance department of 50 people for managing invoices
- Introduced a finance chatbot with Azure OpenAI, accelerating issue resolution and reducing manpower from 50 to 1
- Optimized AWS data pipeline, saving \$3000 monthly and boosting performance by 75%
- Revamped legacy processes to modern microservices architecture, achieving 95% speed improvement and streamlined maintenance

Software Engineer

StaffWise

January 2021 – February 2023

Wichita, KS

- Successfully designed and implemented a healthcare financial web application to empower staffing within hospitals, resulting in \$50,000 of savings monthly for hospitals
- Built a REST API in Node.js using TypeScript from scratch to drive the functionality of the application
- Constructed and executed state-based database development utilizing Microsoft SQL Server, resulting in streamlined data management and improved system performance by 20%
- Orchestrated resource provisioning and service deployment in Microsoft Azure using Terraform, establishing a scalable infrastructure, improving time to spin up new environments by 70%
- Built a user flow using serverless functions in Azure to allow users to upload Excel files of hospital information and parse the data to store in the database, improving the onboarding process time by 90%
- Efficiently managed 6-member cross-functional team, overseeing end-to-end project lifecycles, ensuring timely deliverables, stakeholder satisfaction, and successful achievement of project objectives

EDUCATION

Bachelor of Science in Computer Science - Wichita State University, Wichita, KS

May 2023

PROJECTS

- **Sonification of 3D Space Models** – Web app to create 3D models from 2D images and create sounds for them, Winner of 2023 NASA Space Apps Challenge
- **Chess.com Companion Website** - Connects the Chess.com public API with a free chess game analyzer website
